Subject: 34 Poplar

To whom it may concern,
my name is Lisa Gorham , I live directly across the street and have the most direct view, and are the most affected by the project. I have reviewed the plans and support the project. While you understand there are questions about distance from the street and style I don't believe those should stand in the way of project approval.

Overall I am very comfortable with the distance from the street and support the gable roof design.
